Crossings
Lowland
Highland
Floodplain reading (pairs bootstrap)
Floodplain reading (defined after the class estimates)
without bank, au, dike and polder forms
Capped sample: variants of sample and reading (pairs bootstrap)
All AOIs
AOIs with a recorded flood type
Without AOIs lacking hydrography
Without Oceania and the Americas
Cleaned reading
Without Pakistan and Bangladesh
One definition of permanent water
Bare-earth elevation model
Capped sample, by the images behind the EMS maps (pairs bootstrap
Sentinel-1
Other radar
Optical
Not recorded
Capped sample, by river size; reading by river names (cluster-robust)
Nearest river < 100 km²
Nearest river 100–1000 km²
Nearest river ≥ 1000 km²
Name contains a nearby river or lake name
Corrected for misreadings (2.5th–97.5th percentiles of a bias analysis
Truly water-related names, illustrative rates
